- **Playlist Library**

In this tab you can create own Formats and Playlists. Also, you can add the songs in playlist.

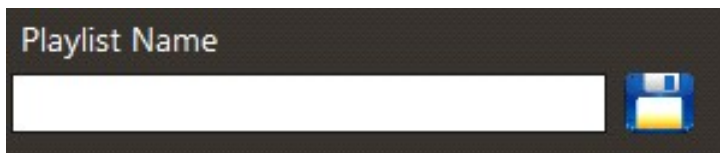

- **New Format**

If you want to create new format, then you click on this icon  and format dropdown should be blank means show with white background.

- **Format popup:** After click on icon this popup screen will show and here you type name and click on “Save” button.

A dark-themed modal window titled "Format Name" in yellow. It contains two input fields: "Name" with a white text box and "Color" with a light gray color picker. At the bottom right are two buttons: "Save" and "Cancel", both with yellow text.

- **Update Format Name:** If you want to update name of format, then you click on this icon  and this time format dropdown should be selected with name which you want to update.
- **New Playlist:** If you want to create new playlist then you first select format after you type playlist name save icon.

A dark-themed form titled "Playlist Name" in light gray. It features a long white text input field. To the right of the input field is a blue floppy disk icon, which serves as the save button.

- **Update Playlist Name:** If you want to update playlist name then you first select format. In playlist list you click on “[Edit](#)” link which playlist name you want to change. Then that name is appearing in upper textbox where you can change the name.

- **Adding songs in Playlist:** To add songs in the selected playlist, you need to select the songs (from bottom) and then click on this button. . You hold one song and with the shift button it is possible to select more songs at the same time. You can also search a song by audio, video, title, artist, album by typing its name in the search box. After that press the enter key or the search button.

11. Store & Forward

In this screen we can schedule the playlist by first selecting the format name. After that the playlist name is selected and then can schedule the start time, end time and week day for the corresponding token number.

Format: In this dropdown only, that format will come which you create in “Playlist Library”.

Playlist Name: Selected format playlist will show in this dropdown.

Start Time & End Time: Playlists work with start time & end time.

Note: If you want to create schedule for 24hours then end time not be exceed “11:59 PM” because auto update run on Store & Forward (Audio & Video) player from “11:59 AM” to “12:00 AM”. If you want to run player at midnight, then you can manage like that:

Playlist1=> Start time any and end time “11:59 pm”.

Playlist2 or Same playlist => Start time “12:00 AM” and End time (Which you want)

Week Day: You can manage playlist schedule according week days.

Token List: In the bottom token lists are show of selected customer name. You can assign same playlist schedule to one or more tokens with tick in first column of token list.

Ads Playing Mode: 3 types of playing mode: IsMinute, IsSong, IsTime

➔ **IsMinute:** For Example, I have set 10min for 2 ads in the list, then 1st ads will play after 10 min and 2nd ads will play after 10min from finish the 1st ads, same for others, so it will not play continuously.

➔ **IsSong:** For Example, I have set 10Songs for 2 ads in the list, then 1st ads will play after 10 Songs and 2nd ads will play after 10Songs from finish the 1st ads, same for others, so it will not play continuously.

➔ **IsTime:** For Example: 2 ads in the list, 1st ads 10:00 am, 2nd 11:am then 1st ads will play when local time is matched and same for others, it will not play continuously.

Playing Type: Two type of playing types “Hard Stop” and “Soft Stop”.

➔ **Hard Stop:** if playing type is “Hard stop” then current playing song is stop immediately and play ads. After finish, the ads it should not play same song. It should go for next song.

➔ **Soft Stop:** if playing type is “Soft Stop” then current running song will not stop, it should wait for completion of running song then play the ads. After finish, the ads it should not play same song. It should go for next song.
