2. Token Information:

This screen stores the information in terms of name, country, state, city, location, expiry date, player type and license type of token. This screen also gives the information of playlist schedule, advertisement for the corresponding token number. We can also reset token by clicking the reset button.

We manage token with Two types:

- 1. Store Forward:** When we select this type then complete player work from dealer panel. For example, we need to create playlist schedule (Without playlist schedule player will not work), advertisement (if needed).

Note: If you want to register video player or audio player then need to be tick this option. Not implement on local management players.

2. **Stream:** This type is representing the local management player. When we select this type then no need to make playlist schedule because player create auto local playlist when we register the player.

We manage token with Two media types:

1. **Audio:** This media type is representing audio players. If you want to install audio player, then you should tick this media type before installing player.
2. **Video:** This media type is representing video players. If you want to install video player, then you should tick this media type before installing player.

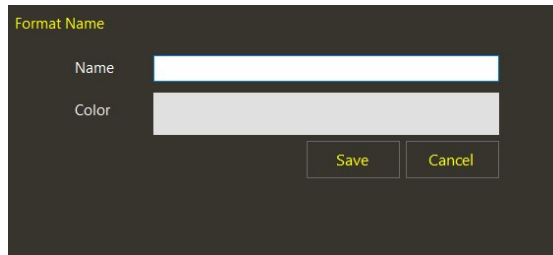

Token User Rights:

1. **Lock:** If you tick this option then only playlists are show in player and this option is implement only on store forward audio player.
2. **Un-Lock:** If you tick this option then all options are show in player and this option is implement only on store forward audio player.

S&F Playlist Schedule Tab: Here all playlist schedule show for the corresponding token. We can also change the “Start Time” and “End Time” of scheduled playlist.

Advertisement Tab: In this tab all advertisements are show for the corresponding token.

- **Format popup:** After click on icon this popup screen will show and here you type name and click on “Save” button.

A dark-themed popup window titled "Format Name" in yellow text. It contains two input fields: "Name" with a white text box and "Color" with a light gray color picker. At the bottom right, there are two buttons: "Save" and "Cancel", both with yellow text.

- **Update Format Name:** If you want to update name of format, then you click on this icon  and this time format dropdown should be selected with name which you want to update.

- **New Playlist:** If you want to create new playlist then you first select format after you type playlist name save icon.

A dark-themed screen titled "Playlist Name" in white text. It features a long white text input field. To the right of the input field is a small icon of a floppy disk with a blue and yellow design.

- **Update Playlist Name:** If you want to update playlist name then you first select format. In playlist list you click on “[Edit](#)” link which playlist name you want to change. Then that name is appearing in upper textbox where you can change the name.
- **Adding songs in Playlist:** To add songs in the selected playlist, you need to select the songs (from bottom) and then click on this button. . You hold one song and with the shift button it is possible to select more songs at the same time. You can also search a song by audio, video, title, artist, album by typing its name in the search box. After that press the enter key or the search button.

4. Store & Forward

In this screen we can schedule the playlist by first selecting the format name. After that the playlist name is selected and then can schedule the start time, end time and week day for the corresponding token number.

Format: In this dropdown only, that format will come which you create in “Playlist Library”.

Playlist Name: Selected format playlist will show in this dropdown.

Start Time & End Time: Playlists work with start time & end time.

Note: If you want to create schedule for 24hours then end time not be exceed “11:59 PM” because auto update run on Store & Forward (Audio & Video) player from “11:59 AM” to “12:00 AM”. If you want to run player at midnight, then you can manage like that:

Playlist1=> Start time any and end time “11:59 pm”.

Playlist2 or Same playlist => Start time “12:00 AM” and End time (Which you want)

Week Day: You can manage playlist schedule according week days.

Token List: In the bottom token lists are show of selected customer name. You can assign same playlist schedule to one or more tokens with tick in first column of token list.

Ads Playing Mode: 3 types of playing mode: IsMinute, IsSong, IsTime

- **IsMinute:** For Example, I have set 10min for 2 ads in the list, then 1st ads will play after 10 min and 2nd ads will play after 10min from finish the 1st ads, same for others, so it will not play continuously.
- **IsSong:** For Example, I have set 10Songs for 2 ads in the list, then 1st ads will play after 10 Songs and 2nd ads will play after 10Songs from finish the 1st ads, same for others, so it will not play continuously.
- **IsTime:** For Example: 2 ads in the list, 1st ads 10:00 am, 2nd 11:am then 1st ads will play when local time is matched and same for others, it will not play continuously.

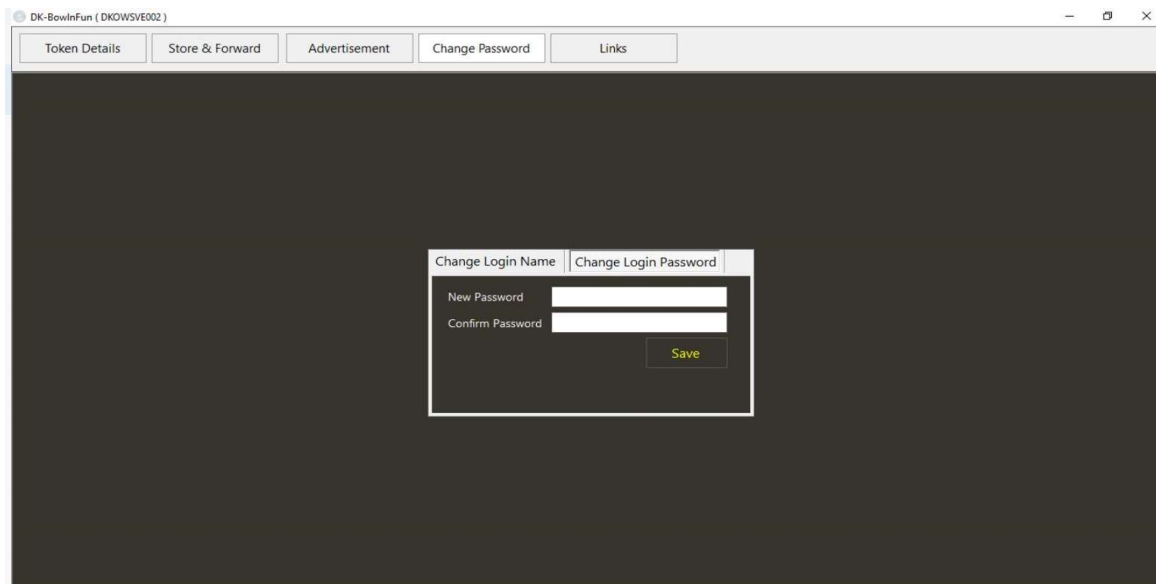

Playing Type: Two type of playing types “Hard Stop” and “Soft Stop”.

- **Hard Stop:** if playing type is “Hard stop” then current playing song is stop immediately and play ads. After finish, the ads it should not play same song. It should go for next song.

- **Soft Stop:** if playing type is “Soft Stop” then current running song will not stop, it should wait for completion of running song then play the ads. After finish, the ads it should not play same song. It should go for next song.

6. Change Password

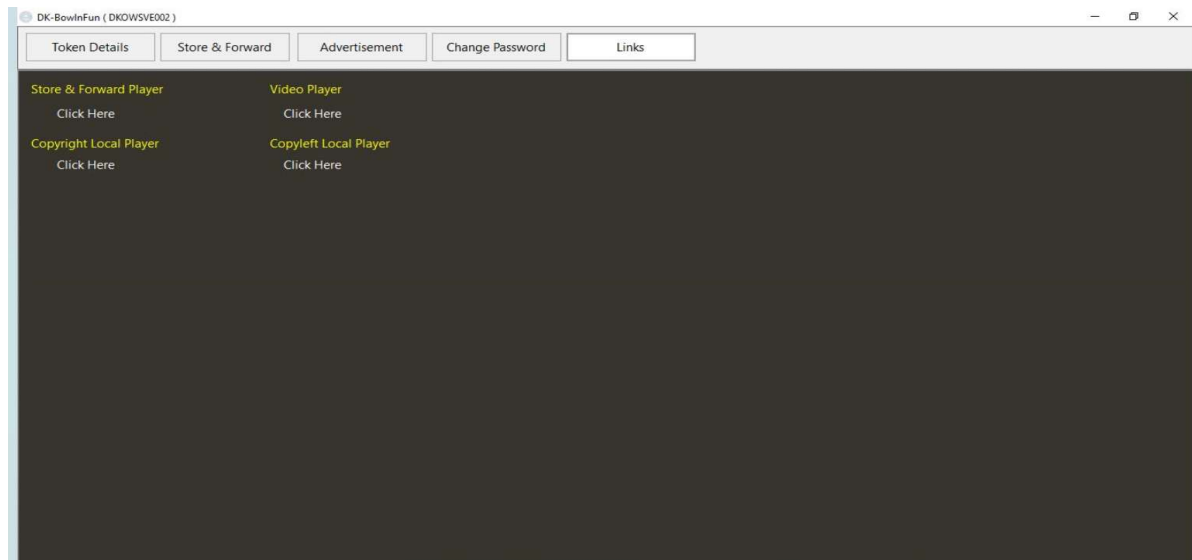

In this screen the login name and password can be changed by clicking on the Change Password and Change Login Name tab.

The screenshot shows a web application window titled "DK-BowlFun (DKOWSVE002)". The window has a navigation bar with five tabs: "Token Details", "Store & Forward", "Advertisement", "Change Password", and "Links". The "Change Password" tab is selected. Below the navigation bar, there is a dark gray background. In the center, there is a white-bordered box containing two sub-tabs: "Change Login Name" and "Change Login Password". The "Change Login Password" sub-tab is selected. Inside this sub-tab, there are two input fields: "New Password" and "Confirm Password". Below these fields is a yellow "Save" button.

7. Players Link

In this screen the links are available for the players.

If you have any query regarding dealer exe, please contact us and provide your feedback at jan@myclaud.com.
